Experience

Brown Surfing

Denver, CO Front-End Developer

May 2019 - Present

In charge of building custom themes in WordPress and providing ongoing maintenance. Using HTML, CSS, JavaScript to provide a good user interface. Built mainly with ACF for scalability and ease of use. Adding tracking, reporting, & re-marketing tools. Integration of plugins or any other software the client needs.

Crimson Recourses Management

Denver, CO Recruiter

May 2017 - June 2017

My duties included finding the proper candidates, calling them, which sometimes meant having to get through a receptionist. After getting through receptionist, tell the candidate about the new job offer and see if they were interested. If interested, let the senior recruiters take over.

Rounded Digital

Denver, CO Web Developer

July 2017 - December 2018

In charged of web design, development, site structure, content management (including finding stock photography and/or videos), hosting, website maintenance, on-page SEO, Google Crawl, GA/GSC, GMB/Social Media integration and client management. There were regular meetings with clients throughout the development process and afterwards to explain progress and results.

Front Range CAD Services

Evans, CO CAD Drafter

May 2016 - July 2016

Made corrections sent back by the city/client using AutoCAD. In here I would make edits to either the elevation, floor plan, plot plan, section and detail. Often called "red lining" work because the corrections would be sent back with red pen marks and I then make the corrections to the CAD file.

Education

CU Denver

Denver, CO Architectural Program

August 2016 - July 2017

I was in the architectural program and enjoyed all the program-specific classes like Studio, History of Architecture and my favorite, Survival Sketching. In here, I learned the concepts of the design process architects use. For History of Architecture and Survival Sketching, we had to do different projects describing buildings and the thought behind them.

Aims Community College

Greeley, CO CAD Program

January 2015 - August 2016

Enrolled in the CAD program offered here, while taking the required general classes. I learned how to use AutoCAD and Revit for architecture. For mechanical engineering, we used Inventor and Solidworks. While finishing up school, one of my advisors helped me get a job at Front Range CAD Services.
